

This is a L^AT_EX document.

A rectangle has side length of $(x + 1)$ and $(x + 3)$.
(*variables*) Dollar Sign tells compiler that you are using MATH mode.

The equation $A(x) = x^2 + 4x + 3$ gives the area of rectangle.

The equation

$$A(x) = x^2 + 4x + 3$$

gives the area of rectangle.
